

Activating a Russian Keyboard Layout on Windows XP at Sarah Lawrence College

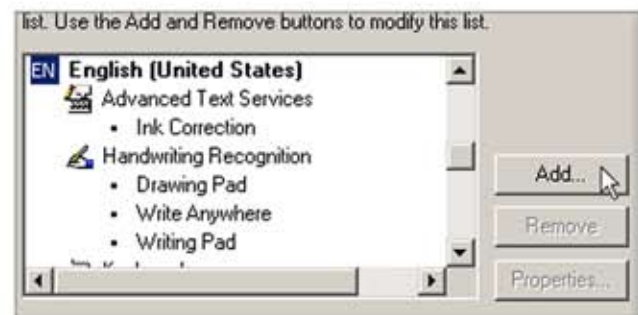

1. Click on the **Start** button, then go to **Settings** and click on **Control Panel**.

2. In the **Control Panel** window, double-click on **Regional and Language Options**.

3. In the **Regional and Language Options** window, click on the **Languages** tab, then click **Details**.

4. In the **Text Services and Input Languages** window, click the **Add** button.

5. In the **Add Input Language** window, click on the down arrow button next to the **Input Language** field, then scroll down and click **Russian** in the drop-down menu. Click **OK** when finished.

6. In the **Text Services and Input Languages** window, click on the down arrow in the **Default input language** field and click **Russian**. Click **Apply** when finished.

Test the keyboard by typing in these test words:

sssr should display CCCP
tom should display TOM
matt should display MaTT
kat should display KaT
